Background

Some state laws require that individuals (or their authorized representative) provide written informed consent to the physician ordering germline genetic testing and/or releasing test results.

The individual (or authorized person) must sign and date a consent form that includes:

- Statement of test purpose and description
- Statement that prior to testing, the physician ordering the test discussed with the individual the reliability of positive/negative test results and the level of certainty that a positive result for the disease or condition serves as a predictor of such disease
- Statement that the physician informed the individual about availability and importance of further testing, physician consultation and genetic counseling, and provided written information identifying a genetic counselor or medical geneticist
- General description of each disease or condition for which a test is ordered
- The name of the person or persons to whom the test results may be disclosed
